ABOUT ME:

As a skilled software engineer specializing in web development, I excel in crafting dynamic and responsive websites using HTML, CSS, and JavaScript. My passion lies in harnessing these technologies to create user-friendly and visually captivating web applications. Additionally, I possess proficiency in Python, enabling me to develop versatile and efficient solutions across various domains. My dedication to continuous learning and improvement ensures that I remain abreast of the latest industry trends and best practices.

SOFT SKILLS:

Adaptability, Effective Communication, Critical Thinking, Interpersonal Skills

EXPERIENCE:

Python Full Stack
Intern

- Developed web applications utilizing Python frameworks (Django/Flask), HTML, CSS, and JavaScript.
- Built RESTful APIs, designed user interfaces, and implemented database interactions. Enhanced problem-solving, teamwork, and technical skills within a professional environment.

PROJECTS:

Online Movie Booking System:
Developed a user-friendly system with seat selection, payment integration, and personalized recommendations for a seamless movie-going experience.

Digital Clock:
Created a functional and aesthetically pleasing responsive digital clock application accurately displaying time.

Password Generator:
Designed a secure password generator with customizable parameters for length, character types, and complexity.

Replica of L'Oréal Paris:
Implemented a replica of the L'Oréal Paris website with a product catalog, personalized consultations, and a validated, responsive design.

Portfolio:
Built a professional online portfolio showcasing skills, projects, and achievements, providing an overview of work experience and displaying creative and technical abilities.
